

Successful speedikon FM AG roadshow in Zurich

The speedikon FM AG group of companies successfully held its roadshow in Zurich on September 25. Customers and interested parties discussed topics such as facility management, artificial intelligence, energy management, Net Zero and New Work. The presentations on AI and digital twins were particularly impressive. The event also focused on networking and exchange.

Zurich, Switzerland, September 26, 2024 - The speedikon FM AG group of companies held its roadshow in Zurich on September 25 with great success. Numerous customers and interested parties took part in the exclusive event, at which pioneering solutions and trends in the field of digital transformation were presented. The topics of facility management, artificial intelligence, energy management, net zero, skills shortages and new work were the focus of the discussions.

“It was a great group with exciting conversations and discussions on the most important challenges currently facing our customers,” says Adrian Merkel, CEO of speedikon FM AG. “Our roadshow provided an ideal platform to discuss new approaches with our partners and customers on how companies can be future-proofed in the areas of facility management and digitalization.”

The presentations on the topics of artificial intelligence in facility management, the optimization of energy data management and the possibilities of photorealistic digital twins were particularly well received. Many participants were impressed by the solutions presented, which can contribute not only to increasing efficiency but also to achieving Net Zero targets. In addition, discussions about the shortage of skilled workers and the challenges of new working environments (New Work) ensured lively and forward-looking conversations. After the presentations, the participants made extensive use of the opportunity to network and exchange ideas. “Direct dialog with our customers and interested parties is invaluable to us. This is the only way we can ensure that our solutions precisely meet the requirements that exist on the market,” Adrian Merkel continued.

About speedikon FM AG

speedikon FM AG is a pioneering software company that specializes in the digitalization of technical and commercial processes within buildings, data centers, and industrial plants. Since 1997, our company has been providing not just products, solutions, and technologies, but also a comprehensive range of services that empower our customers to optimize their asset-related business operations. Our team at speedikon FM AG possesses extensive expertise in handling vast amounts of data, complex databases, and seamless integration with existing software and hardware solutions.
